**ribbon** la struttura portante delle scrivanie e dei tavoli riunione è in alluminio verniciato ed è costituita da tre elementi: due fasce che hanno la funzione di gambe e un sostegno perimetrale del piano di scrittura. Il piano di scrittura è suddiviso in tre. Due piani laterali ed uno centrale, realizzati in cristallo acidato sciolto, o in pannello nobilitato nero rivestito in cuoio oppure in pannello di particelle di legno impiallacciato con essenza di betulla.

I mobili contenitori hanno la struttura in pannello di particelle di legno laccato microsfera colore grigio antracite. Le maniglie e i piedini sono in alluminio verniciato. Le ante e i frontali dei cassetti sono in pannello di particelle di legno laccato microsfera colore grigio antracite e rivestito in cuoio oppure impiallacciato in essenza di betulla, o infine in cristallo acidato (solo per le ante) con telaio in alluminio verniciato. Il mobile bar può essere dotato di frigorifero di 50 litri. Il mobile sopraelevato è illuminato al neon. Le consolle hanno la struttura portante costituita da tre elementi in alluminio verniciato (due gambe e un sostegno per il piano). I piani possono essere in cristallo acidato e sciolto, in pannello nobilitato nero rivestito in cuoio oppure in pannello di particelle di legno impiallacciato in legno di betulla. Nelle consolle basse c'è anche un piano inferiore in cristallo acidato o in betulla, fissato alla struttura con opportuni sostegni regolabili.

Poltrone direzionali. Lo schienale e il sedile hanno una struttura in acciaio annessa in uno stampo di poliuretano schiumato a freddo e i cuscini in poliuretano espanso indeformabile ed esente da CFC. Lo schienale ed il sedile sono collegati da una piastra in acciaio, che sostiene tutta la struttura della poltrona verniciata a spruzzo, in colore alluminio. I braccioli sono in poliuretano rigido compatto con un elemento superior in poliuretano integrale entrambi verniciati a spruzzo colore alluminio. Le poltrone sono regolabili in altezza mediante pistone a gas, hanno meccanismo ergonomico e la base a 5 razze in alluminio pressofuso verniciata a spruzzo colore alluminio.

La struttura portante della poltrona a pozzetto è un unico elemento per lo schienale e per i fianchi in pannello di particelle di legno ricoperto internamente da poliuretano espanso ed esternamente rivestito in cuoio; il sedile ha una struttura in pioppo con molleggio da cinghie elastiche incrociate e ricoperto con poliuretano espanso. La poltrona ha un cuscinetto per la schiena in poliuretano espanso e un bracciolo che corre lungo fianchi e schienale in pannello multistrato di faggio verniciato colore alluminio. Alla base sono fissate quattro rotelle in ABS con gomma morbida antigraffio.

**ribbon** the load-bearing frame of the desks and the conference table is in aluminium varnished and comprises three elements: two bands which act as legs and a perimeter support of the writing top. The writing top is divided into three parts. one central and two side extension tops made in boxed acid etched glass or in black melamine coated panel covered by saddle leather or in birch wood veneered particleboard panel.

The storage units frame is made by grey anthracite textured lacquered particleboard panels. The handles and legs are in aluminium varnished. The doors and drawer fronts are in grey anthracite textured lacquered particleboard and covered by saddle leather or veneered in birch wood or in acid etched glass (only the doors) with aluminium varnished frame. The bar cabinet can have a 50-litre fridge. The upper unit is fitted with a neon light.

The consoles load-bearing frame is composed by three aluminium varnished elements (two legs and a support for the top). The tops may be in boxed acid etched glass or in black melamine coated panel covered by saddle leather or in birch wood veneered particleboard panel. In the low consoles there is also a shelf in acid etched glass or birch wood, which is fixed to the frame with suitable adjustable supports. Executive armchairs. The back and the seat steel frame is embedded in a cold formed polyurethane and the cushions are in resilient CFC-free polyurethane foam. The back and the seat are joined together by a aluminium colour spray varnished steel plate, which supports the entire armchair frame. The arms are in rigid polyurethane foam, with an upper element in self skinning polyurethane foam; both have an aluminium- effect spray paint finish. The armchairs have a 5 star aluminium colour spray varnished swivel base in pressure die-cast aluminium, they are equipped by a tilt mechanism and are height adjustable through a gas-piston. The tub chair load-bearing frame is a single element for the back and the sides made of particleboard, completely covered by polyurethane foam and covered by saddle leather. The poplar wood frame seat has a springing provided by crossed elastic belts and is covered by polyurethane foam. The armchair has a back cushion in polyurethane foam and a beech multiply panel armrest with aluminium colour paint finish that runs along the sides and back. On the base there are four ABS castors covered with non-scratch soft rubber.

**ribbon** die tragende Struktur des Schreibtische und Konferenztische ist aus eloxiertem Aluminium und besteht aus drei Elementen: Zwei Bänder werden als Beine eines als Unterkonstruktion für die Schreibtischplatte benützt.

Die Schreibtischplatte besteht aus drei Teilen. Die zwei Seiten – und die Zentralplatte sind entweder aus geätztem Glas, aus einer Spanholzplatte mit Birkenholz furnier oder aus geätztem Glas ( Türen) mit einem Rahmen aus eloxiertem - Aluminium. Türen und Schubladenfronten aus Melaminpaneelen sind lederbezogen oder aus Spanholzplatte mit Birkenfurnieren oder aus geätztem Glas ( Türen) mit einem Rahmen aus eloxiertem Aluminium. Der Barschrank kann von einen 50- Liter - Kühlschrank ausgestattet sein. Der Aufsatzschrank ist mit einer Neonbeleuchtung ausgestattet.

Die Korpusse der Schränke haben eine tragende Struktur von 3 Elementen aus lackiertem Aluminium ( zwei Beine und eine Stütze für die Platte. Die Platten Können aus geätztem Glas ( Türen) mit einem Rahmen aus eloxiertem Aluminium sein. In die niedrige Konsole es gibt auch einen unterem geätz Glas oder aus Birkenholz Platte befestigt an der Struktur mit angebrachte Träger.

Direktionssessel. Die Rückenlehne und der Sitz haben einen von biegsamen PUR –Schaum ummantelten Stahlkern. Die Kissen bestehen aus drehbarem, unverformbares und CFC- freiem PUR. Die Rückenlehne und der Sitz sind mit einer starken Stahlplatte verbunden. Diese Platte hält die gesamte Aluminiumfarben Spritzlackieren Sesselstruktur zusammen. Die Armlehnen bestehen aus hartstrukturiertem PUR- Guß mit einem Element in Integral Polyurethanschaum beiden Aluminiumfarben Spritzlackieren Gussaluminium.

Die Sessel sind durch eine Gasfederung höhenverstellbar und haben einen ergonomischen Mechanismus sowie einen 5 – Speichen Fuß aus Aluminiumfarben Spritzlackieren Gussaluminium.

Die tragende Struktur besteht aus einem einzigen Teil und bildet die Rücken und Seitenlehne aus einer Spanholzplatte, die innen mit drehbarem PUR ummantelt und Außen Lederbezogen ist. Der Sitz hat eine Struktur aus Pappelholz und eine Federung aus gekreuzten Spanngürteln und ist mit drehbarem PUR überzogen. Der Hochlehner hat ein Rückenkissen aus dehnbarem PUR sowie seitlich und hinten verlaufende Armlehnen aus massivem, Aluminiumfarben lackiertem Buchenholz. Das Gestell ist mit 4 ABS Rollen ausgestattet und mit weichem, kratzfestem Gummi überzogen.

**ribbon** la structure portante des bureaux et des tables de conférence est en aluminium verni et elle est composée de trois éléments: deux bandes qui sont les pieds et un support périmétral du plan de travail. Le plan de travail est divisé en trois parties: deux plans latéraux et un central, réalisés en verre acide bordé sur le pourtour, ou en mélaminé noir recouvert de cuir ou en aggloméré de bois plaqué bouleau.

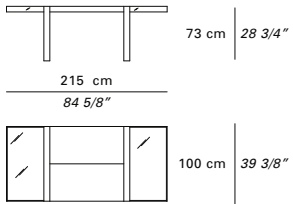

Les meubles de rangement sont en aggloméré de bois laqués avec un effet rêche de couleur gris anthracite. Les poignées et les pieds sont en aluminium verni. Les portes et les façades des tiroirs sont en en aggloméré de bois laqué avec un effet rêche de couleur gris anthracite et recouvert de cuir, plaqué bouleau ou en verre acide (seulement pour les portes) avec un châssis d'aluminium verni. Le meuble bar peut contenir un frigo de 50 litres. La rehausse est éclairée avec un néon.

Les consoles ont une structure portante formée de trois éléments en aluminium anodisé naturel (deux pieds et un support pour le plan). Les plans peuvent être en verre acide bordé sur le pourtour, en mélaminé noir recouvert de cuir ou en aggloméré plaqué bouleau. Les consoles basses sont également dotées d'un plan inférieur, en verre acide ou en bouleau, fixé à la structure à l'aide de supports réglables. Fauteuils de direction. Le dossier et l'assise ont une structure en acier noyée polyuréthane expansé. Les coussins sont en polyuréthane expansé indéformable et sans de CFC. Le dossier et l'assise sont unis par une plaque d'acier peinte au pistolet de couleur aluminium, qui soutien toute la structure du fauteuil. Les accoudoirs, en polyuréthane rigide compact, ont une partie supérieure en polyuréthane intégral. Les deux sont vernis au pistolet de couleur aluminium. Les fauteuils, réglables en hauteur par un système à gaz, possèdent un mécanisme ergonomique et un piétement à cinq branches en aluminium coulé sous pression, peint au pistolet de couleur aluminium. La structure des fauteuils bas dossier est composée d'un seul élément pour le dossier et les côtés en aggloméré de bois recouvert à l'intérieur de polyuréthane expansé et de cuir à l'extérieur. L'assise a une structure en peuplier. Le soutien est garanti par des sangles élastiques encastrées et recouvertes de polyuréthane expansé. Le coussin de dossier est en polyuréthane expansé. L'accoudoir est en hêtre multiplis verni couleur aluminium. A la base il y a quatre roulettes en ABS avec caoutchouc souple.
